

# Dice Games

Dice can be used to create home math games for number concept skills. For counting games, use small toys, dry noodles, beans, rocks, plastic caps, or anything that your child collects.

**Roll the dice and say the number**

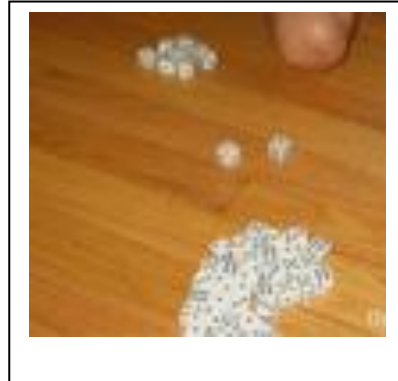

**Two Players roll and identify which number is greater/less.**

**Roll the dice and color the corresponding number.**

**Roll and choose that number of objects.**

**Dice war- divide dice in 2 groups, take turns rolling, greater number takes both dice.**

**Two Players take turns rolling and counting that many objects into their pile.**

**Two players each have a game card and roll to race to cover up all the numbers first.**

**Roll 2 dice and say 2 digit numbers, ie: 54, 26**

**Make your own giant die!**
